Mitsubishi Electric is undergoing quality assurance by SundaHus

Mitsubishi Electric has started work that will lead to the quality assurance of our products on the basis of materials and the environment by SundaHus.

The construction industry has several different voluntary initiatives (BASTA, Byggvarubedömningen and SundaHus for example) that aim to achieve non-toxic and sustainable construction. As part of this, increasingly exhaustive demands are made on the suppliers of building products to detail the chemical content of their products.

Mitsubishi has chosen to use SundaHus, which carries out the assessment of building materials on behalf of clients such as contractors, construction clients, architects and insurance companies. The aim is to simplify the process for interested parties, and to create the conditions needed for the conscious choice of materials based on an environmental and health perspective.

The upshot is that Mitsubishi Electric has started work on declarations in the SundaHus Miljödata system to make it easier for construction clients to meet the environmental requirements they impose on their projects.

Mitsubishi Electric views the assessment of its products on the basis of chemical content as a quality assurance process. For example, in the assessment of building products in SundaHus Miljödata there is a requirement to demonstrate a correctly completed building product declaration. Declarations contain information about what products are made of; these then form the basis of environmental assessments by SundaHus. Among the products assessed so far are the MSZ-FH series, PUHZ-ZRP outdoor units and the new PAC-IF013.

SundaHus

See www.sundahus.se (Page in Swedish) for further information.

Mitsubishi Electric is a global leader in the research, manufacturing and marketing of electrical and electronic equipment used in communications, consumer electronics, industrial technology, energy and transportation. Its head office is located in Häggvik, north of Stockholm. The company also has offices in Gothenburg and Lund.

The company has operated in the Nordic region for more than 30 years and has 50 employees. Mitsubishi Electric Scandinavia is responsible for sales and the support of its own products in Sweden, Finland, Denmark and the Baltic states.
